30 Open Red Angus, Hereford & Crossbred Heifers
Select group of bred females and cow/calf pairs**

Seneca County Fairgrounds 100 Swift Street Waterloo, NY 13165

RIGHT TIME

RIGHT GENETICS

RIGHT FOR THE INDUSTRY

Friends and Fellow Cattle Producers:

Welcome to the 2nd Annual Right on Red Sale! We invite you to join us on Saturday, April 27, 2024 at 1:00 p.m. at the Seneca County Fairgrounds in Waterloo, NY. Cattle will be available for viewing beginning at 3:00 p.m. on Friday, April 26 as well as Saturday, April 27. We think you will be well pleased with this tremendous offering of cattle that represents the best in both Red Angus and Hereford genetics.

This offering represents years of planning and implementing breeding programs that combine some of the best genetics available with structural correctness and eye appeal that will fit in today's U.S. Beef Industry.

In November 2023, the majority of the yearling bulls and females in this offering began a development program at Erwindale Farms in Waterloo, NY. These cattle have been developed on a high forage diet and continually assessed for structural correctness, optimal growth and measured for carcass characteristics using ultrasound technology. Additionally, all bulls have undergone a breeding soundness exam.

Breeders also had the opportunity to develop heifers and bulls at home as well as consign bred females and cow/calf pairs. All cattle, whether developed at Erwindale Farms or at home followed a rigorous vaccination protocol and will settle nicely into your herd.

The progressive breeders that are part of this sale brought their best! We were really proud of the cattle we offered last year, however, this year's offering are even better. Again, these breeders have dug deep and are offering genetics that would have improved their own herds.

We hope you can join us on Saturday, April 27, 2024. If you can not be with us in person, bid online thru DVAuctions or contact us to handle your bids in the most confidential manner. Videos of each lot will also be available through the DVAuction website prior to the sale. If you have any questions, do not hesitate to contact us at any time. We look forward to visiting with you in Waterloo, New York!

Schedule of Events

FRIDAY, APRIL 26

Cattle on display starting at 3 p.m.

SATURDAY, APRIL 27

Cattle on display starting at 8 a.m.

Lunch will be available

Sale begins at 1 p.m. ET

The sale will be broadcast by:

SALE TERMS & CONDITIONS

TERMS: Cash or good check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

HEALTH: The health of the cattle selling is excellent. Each animal is ready for interstate shipment.

GUARANTEE: Animals will be sold under the appropriate breed association Recommended Terms of Sale for Auctions (www.redangus.org and www.hereford.org).

BREEDING GURANTEE: All animals are guaranteed by the Seller to be breeders, with the exception of: i. Calves less than 12 months of age; ii. Any females placed in an embryo transfer program and subjected to super-ovulation; or iii. Gross negligence or willful misconduct on the part of Buyer. Females sold as safe in calf have been examined by a competent veterinarian or have been guaranteed safe in calf through a blood test. Females sold as open are guaranteed to be without calf. Bulls have passed a semen evaluation.

EXPECTED PROGENY DIFFERENCES (EPDs): EPDs listed in the catalog were current 3/18/2024. Most current EPDs can be viewed online at redangus.org for Red Angus cattle and hereford.org for Hereford cattle.

LIVESTOCK INSURANCE: Insurance for your purchases will be available sale day.

ANNOUNCEMENTS: Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

LIABILITY: All persons who attend the sale do so at their own risk. Neither the New York Red Angus Association, Seneca County Fairgrounds, Blackbelt Cattle Marketing, the sale managers, the owners nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property. As the sale manager, Blackbelt Cattle Marketing has no responsibilities other than those involved in conducting the sale.

Red Angus Bulls

Lot 1 - FOSTERS STOCKMARKET 3041

Consigned by **Shepard Settlement Farm**.

Lot 1 is sired by Stockmarket, one of the most popular Red Angus sires in the breed. His dam is a red/black gene carrier, who goes back to Charlie cow out of the Kurt Rich herd in Iowa. Lot 1 happened to inherit the black gene from his dam making him black, which also makes him a red/black gene carrier. Mated to red cows, expect half of the calves to be born black and the other half red. Color aside, oh what a powerhouse Lot 1 is - super long, deep muscled, big footed, big testicles! Top 1% of the Red Angus breed for both calving ease and marbling. In fact, when ultrasounded for carcass traits, he scanned 7.51% intramuscular fat, which should push his calves into upper 2/3 Choice to potentially low Prime range for USDA quality grade. Even though you can sleep like a baby at night during calving, his calves are going to get up and grow. Lot 1's WW and YW EPDs are in the top 15% of the breed. It's hard to find fault with this one! **GGP**

Lot 2 - WESSNER COCHISE 2303

Consigned by **B. Wessner Farms**.

Look at this Stockmarket son that has herd bull written all over him! This stud checks a lot of boxes: 15.35 sq. in. ribeye, 5.18% IMF, which says Choice grading progeny all day long, and a 1404 lbs. yearling weight! To say Lot 2 accelerated on feed is an understatement, since he was one of the top gaining bulls at Erwindale Farms this year. Lot 2 is in the top 10% of the Red Angus breed for weaning and yearling weight EPDs and top 3% for REA and Marbling EPDs. In short, his performance is matching his genetics! It is important to note that Lot 2 is a curbender when it comes to marbling and muscle and has erased the normal antagonism between performance and marbling. All this power and still in the top 26% of the breed for birth weight EPD. This guy will add muscle, length, volume and style with out a ton of birth weight to most any herd. He is out of a great heifer from the Chappell Red Angus camp that knocked it out of the park on her first try and did I forget to mention he is as easy going as they come. Don't overlook this bull! **GGP**

Lot 3 - WESSNER STOCKMAN 2309

Consigned by **B. Wessner Farms**.

Wow! Look at the overall depth, length and muscle mass of your next herd bull! Stockmarket really engraves his sons with carcass and growth and Lot 3 is no exception. Study his EPD profile and take note that this bull is in the top 5% of the Red Angus breed for ProS, GM and Marbling. Additionally, Lot 3 is in the top 10% of the breed for weaning and yearling weight. But performance is not the only thing this bull does well. With EPDs of 15 for CED and -2.2 for BW, Lot 3 should be good on the calving ease end as well! He comes from a powerful Cedar Hill cow whose calves top our weaning weights every year, who is deep ribbed and nicely uttered with near perfect feet. Lot 3 will make multiple improvements in one swoop in your herd. Make sure you have him circled. **GGP**

Red Angus Bulls

Lot 4 - WESSNER AXLE 2310

Consigned by **B. Wessner Farms.**

If you're looking for power with calving ease, Lot 4 is your bull. This guy's 16 CED and -4.7 BW EPDs will have you sleeping like a baby during calving season. As an added bonus, you're not giving up performance because his calves are going to get up and grow. He comes from one of our longest used, proven cow family's here at B. Wessner Farms. Lot 4's dam has proven performance and a just a get it done attitude that is easy keeping and breeds every year. **GGP**

Lot 5 - LIPTON STOCKMARKET 215L

Consigned by **Pleasant View Farms, Inc.**

Sired by the renowned Bieber Stockmarket E119, Lot 5 combines the best of both worlds for exceptional performance and structure. Lot 5 boasts an impressive 10 EPDs in the top 35%, with top 1% rankings in WW, YW, ADG, and Marbling! His long and bold body structure on a great leg and foot promises strength and resilience. But that's not all! Lot 5's carcass scans are remarkable, with a 14.92 sq. in. REA & 5.73% IMF. Adding to his appeal, his dam SRN 2143 is a Grand Prairie daughter with an impressive 102 MPPA. This bull truly stands out from the rest. **GGP**

Lot 6 - HARTMAN L02 LOUIE

Consigned by **Judd Farm.**

Talk about your sleep all night calving ease! Top 1% Calving Ease Direct, Top 1% Birth Weight, Top 1% Calving Ease Maternal, while still managing to throw down a 13.40 sq. in. REA. This Bieber Stockmarket E119 son is an ET calf out of the Great Miss Pan 5091, the high selling female in the 2022 Big Sky Elite Female Sale. Put him with your heifers this Fall and let him go to work, you won't be sorry come calving season. **GGP**

Red Angus Bulls

Lot 7 - FOSTERS ENERGIZER 3744

Consigned by **Shepard Settlement Farm**.

Lot 7 is sired by the ever popular Bieber Energize F121, who is known for his outstanding phenotype, foot structure and outstanding genetic profile, combined with Rollin' Deep genetics on the maternal side. His dam is also out of the A-1 Kate cow family; powerful cow, this cow never misses. Looking at this bull, you can see the tremendous depth of body and expressive muscle through the stifle and over his top. This bull scanned a large ribeye and is in the top 15% of the Red Angus breed for weaning and yearling weight EPDs. If you are looking to add growth and muscle to your calves, Lot 7 better be circled in the **GGP**.

Lot 8 - LIPTON QUARTERBACK 214L

Consigned by **Pleasant View Farms, Inc.**

Son of the sought-after PIE Quarterback 789 and raised by the impressive WFL Profitmaker daughter Chappell Liberty J424, Lot 8 is the bull that will elevate your herd's profitability! With exceptional performance data boasting 13 EPDs in the top 25% of the breed, including top 15% CED and top 3% YW, wrapping it all together with a remarkable top 3% ProS, he's the all-around bull you've been searching for. Experience exceptional calving ease, explosive growth, and remarkable phenotype with Lot 5. He's exceptionally smooth-shaped in his bold length on a great foot, setting him apart from the rest as the complete package. **GGP**

Lot 9 - FLRA 9352 LIMESTONE RL01

Consigned by **Finger Lakes Cattle Co.**

Lot 9, known as Limestone to us, rolls phenotype and genotype into a multiple trait breeding package! If you're looking to crank up the muscle expression in your calves, his 14.83 sq. inch ribeye area should make a useful contribution to any cow herd. If you are looking to build high quality females, note his breed-leading stayability, Pro-S, and Herbuilder Profiles! His dam is a true powerhouse, and there's two full sisters of Limestone in our herd which are destined to make unparalleled contributions. The dam of this bull is eleven years old, has had 9 calves and has maintained a calving interval of 363 days and an MPPA of 101. Lot 9 is halter and show-broke, and his high-accuracy genomic profile can fix a lot of holes if you need him to! **GGP**

Red Angus Bulls

Lot 10 - PMRA BRACKET 217L

GGP

Consigned by **Monarda Farm.**

Take a look at Lot 10, who is a (HXC Charter 6610D x Larson Sun King 016) herd bull prospect with ProS, HB and GM EPDs well within the top 15% of the Red Angus breed and an ADG of over 4 lbs/day at the Erwindale Bull Development Center. This bull is as long as a freight train with overall balance. Lot 10's dam was 10 years old when he was born last February. Expect his daughters to get in the herd and stay in the herd. This surely is a top bracket bull for any herd because he can do it all!

Lot 11 - PMRA RUBIC 220L

Consigned by **Monarda Farm.**

Lot 11 is out of an excellent HXC Charter 6610D son and a powerful Brown Prestigious B5153 dam. This bull scores well above the Red Angus breed average in GM and marbling EPDs. Lot 11 boasted an ADG of over 4 lbs/day at the Erwindale Bull Development Center and scanned a 13.94 sq. in. ribeye. Lots of growth and carcass in this outstanding bull and he looks the part!

Lot 12 - PMRA MOOSE 208L

Consigned by **Monarda Farm.**

This powerful herd bull prospect is out of the best HXC Dawson 7003E son Monarda Farm has ever raised (PMRA Dulky 306H). Lot 12 is above the Red Angus breed average for GM and marbling EPDs. He is also in the top 20% for yearling weight and top 14% for ADG EPDs. Lot 12 boasted one of the highest ADG's at the Erwindale Bull Development Center this year at 4.54 lbs/day. You need to appreciate his length of body and how well his neck blends in at the top of his shoulder. Plenty of volume and expression of muscle too! GGP

Red Angus Bulls

Lot 13 - RED LEPAGE POWEREYE L5

Consigned by LePage Cattle Ltd..

Lot 13 is sired by Power Eye, who adds structural correctness, muscling and power in a easy keeping package. His maternal grandsire, WEBR TC Card Shark, produces calves that can excel both in the show ring and the real world. Lot 13 is in the top 12% of the Red Angus breed for Gridmaster and the top 30% for yearling weight which bodes well for well performing progeny in the feedlot. Expect his daughters to be low maintenance, easy fleshing females. GGP

Lot 14 - RED LEPAGE LK L7

Consigned by LePage Cattle Ltd..

Look at the balance and eye appeal of this bull. His calves should push down the scales at weaning with adequate muscling to please the pickiest of buyers. Note, his ribeye area was 14.76 sq in. when ultrasounded for carcass traits in February and gained over 5 lbs./day during development at Erwindale Farms. The dam of Lot 14 was 10 years old when he was born and has a MPPA of 102. GGP

Lot 15 - RED LEPAGE BRVHRT L11

Consigned by LePage Cattle Ltd..

Lot 15 is a well balanced genetic profile bull that combines calving ease with growth and maternal milk. However, this bull, with J6 out of Nebraska and Canadian genetics, does not shirk in the muscling category. He scanned 15.26 sq. in. of ribeye and is in the top 20% of the Red Angus breed for ribeye genetics. His dam has an MPPA of 108. GGP

Lot 20 - FLRA H6629 LIBERTY RL10

Consigned by **Finger Lakes Cattle Co..**

Feeder calves and replacement heifers are in short supply, and the market is going to be willing to pay top dollar for high-growth calves! Lot 20 is a low-birth, high growth bull which has been bred to make calves which will really gain. Out of a 2-year old dam, Lot 10 posted the top weaning weight (ratio 121), and top Yearling weight (Ratio 106) in our 2023 bull crop and looks the part! His Gridmaster EPD is in the top 10% of the entire breed, and his 14.77 sq. in. adj. ribeye brings validation to his ideal carcass qualities. He'll also give you the type of females that the industry needs for expansion, with his maternal grandam, FEDDES BLOCKANA 9130 providing a strong link for maternal excellence. **XGGP**

Lot 21 - FLRA H6629 LOONAH RL13

Consigned by **Finger Lakes Cattle Co..**

We have integrated DEEP END into our breeding program throughout our many years as Red Angus breeders, and started using a son of his because of the documented impact which his dam has made on the entire Red Angus Breed. His dam, MUSHRUSH NATOMA J097 was one of the very first registered females offered for public purchase, and we're thrilled to now own her! Her first stab at raising a calf yielded an adjusted weaning weight of 693 lbs, which is over 60% of the weight of his elite mama! This young man, Lot 21, topped the 2024 Finger Lakes Cattle Co. marbling list (4.34%), but yet he was the leanest (.18" back fat) in his class! Selling full possession, but we will retain 25% interest in semen rights. **XGGP**

Red Angus Bulls

Lot 22 - FLRA F765 LONESTAR RL08

Consigned by Finger Lakes Cattle Co..

If you're looking for guaranteed calving ease but don't want to look at scrawny, light-muscled calves next year, Lot 22 will fit your needs. There are not a lot of bulls who will post nearly a 14 square inch ribeye on a live weight basis of just over 1,000 lbs! We know this, because we have been collecting ultrasound data on all of our Red Angus seedstock for over 30 years, and Lot 22 is a living testament of our commitment to breeding efficient cattle with high carcass merit. His maternal grand-dam (RB05) is also the mother of our Lot 9. His 2-year old dam raised him to a 651 lb. weaning weight, and helped him to acquire a top 14% EPD in Marbling, and a stayability of 17. Lot 22 is a tool which can be used to make moderate framed, super-thick feeder calves, and efficient, long-lasting females. **GGP**

Lot 23 - HARTMAN L06 LARRY

Consigned by Hartman Red Angus.

Lot 23 is a calving ease sire from a mating of Herdbuilder (HB) specialist Mushrush Icon and a daughter of Feddes' elite donor dam 9130. He combines good maternal EPD's with good growth and carcass data. His 112day ADG of 4.04 lbs./day, Adj. REA of 17.13 sq. in., and IMF ratio of 118 put him near the very top of the animals in the Erwindale Bull Development in 2024. If you are looking for a solid do everything well bull with that deep cherry color, then circle Lot 23 in the catalog. **GGP**

Red Angus Bulls

Lot 25 - 5LW RED BLOOD 84

Consigned by Wilson Farms - Luke Wilson.

Looking for a calving ease bull that does not give up pounds at weaning or yearling? Lot 25 is a Duff Red Blood 18144 son, who is known for his calving ease, structural correctness and excellent feet out of one of Luke Wilson's show heifers. Lot 25 was her first calf and she weaned him at 671 lbs! In February, Lot 25 scanned a 15.18 sq. in ribeye. You can't go wrong with a bull in the top 9% of the Red Angus breed for calving ease, top 35% for weaning weight, top 15% for maternal milk and top 25% for ribeye area EPD. **GGP**

Lot 26 - 5LW RED BLOOD 82

Consigned by Wilson Farms - Luke Wilson.

Lot 26 is another Duff Red Blood 18144 son bred by 15 year old Luke Wilson. One has to admire Lot 26's length of body, volume and overall eye appeal. His dam, is the maternal granddam of Lot 25, which traces back to 4Y genetics. This bull has solid EPD numbers for birth weight, weaning weight, maternal milk, marbling and ribeye area. **GGP**

Lot 27 - 5LW RED BLOOD 83

Consigned by Wilson Farms - Luke Wilson.

Lot 27 is the third Duff Red Blood 18114 son that Luke Wilson bred. Luke showed this bull's dam that he purchased from Fingerlakes Cattle Company. Much like Lot 25 and 26, you quickly notice the length of body, shape of rib and expression of muscle in this bull. Lot 27 scanned the largest ribeye area of the three Luke Wilson bulls at 15.51 sq. This is the second calf of the Lot 27 dam, who has an MPPA of 104. Overall, Lot 27 excels at weaning weight, maternal milk, marbling and ribeye area. **GGP**

Red Angus Bulls

Lot 28 - MHF RED WING 270

Consigned by **Mariposa Farm.**

What's not to like about this calving ease, phenotypically pleasing package? Lot 28 is a Domain son in the 10% of the Red Angus breed for calving ease, but does not give up one inch on muscling. You can see the muscling across his level top and down through his stifle region. Lot 28 is a calving ease artist in a moderate package packed with muscle. Note the New Direction R240 and Feddes Big Sky R9 genetics on the maternal side of the pedigree. **GGP**

Lot 29 - BDEL FRANCHISE 02L

Consigned by **Delorenzo Ranch.**

What a genetic powerhouse! Being a 9 Mile Franchise son and Stockmarket maternal grandson, his genetics are stacked. Lot 29 is in the top 15% or better of the Red Angus breed for calving ease, ProS, GM, WW, YW, maternal Milk, maternal calving ease, marbling and ribeye area EPDs. All this comes in a moderate package that is phenotypically pleasing. **GGP**

Lot 30 - ERWINDALE FLAWLESS MIKE 2307

Consigned by **Erwindale Farms LLC.**

Lot 30 will add lots of power and growth to your calf crop, along with impeccable carcass qualities. He scanned a huge REA of 17.49 sq. in. with a 116 ratio that equates to 1.41 inches of pure meat to the ribeye area per 100 pounds, which is off the charts putting money in your pocket. You have to appreciate Lot 30's overall volume and muscle expression. **GGP**

Red Angus Bulls

Lot 31 - ERWINDALE FLAWLESS DALE 2322

Consigned by Erwindale Farms LLC.

Wow! Check out the data on this big time herd bull prospect! Lot 31 boasts a 107 YW ratio and scanned 5.39% intramuscular fat (139 ratio)! Talk about pounds with marbling in his feeder cattle with the added bonus of frame and style. His sire, Chappell H407, comes from the famous Zara cow family at Chappell Red Angus that has produced many top selling females over the past decade. Keep all the females out of this guy. **GGP**

Red Angus Bulls

Lot 34 - PHILLIPS LEONARD 300

Consigned by **Wayward Wind Ranch**.

Lot 34 is a Merlin grandson that has a lot packed into him. His EPD profile is moderate and he can be used on a number of cow types to improve the cow herd. Note his BW and Milk EPD values. **GGP**

Lot 35 - PHILLIPS COLT 301

Consigned by **Wayward Wind Ranch**.

What's not to like about this Merlin grandson? He is in the top 5% of the Red Angus breed for both ProS and GM. This is backed up with his outstanding EPDs for weaning and yearling weight, maternal milk, maternal calving ease and ribeye area. Lot 35 is just a well put together package - both phenotypically and genetically. His dam has also been a great producer in our herd with an MPPA of 105. **GGP**

Lot 36 - WILSON WIDELOAD 501

Consigned by **Wilson Farms - Bryan Wilson**.

Lot 36 is a Pelton Wideload son out of one of the foundation dams at Wilson Farms. Pelton Red Angus genetics have been a staple in the Red Angus breed for years and develop functional cattle than can withstand the environment in western Kansas. Wideload puts body mass and volume into his calves while still producing feminine replacement heifers that stand the test of time. The genetics of Lot 36 say just that as you look at ProS and GM EPD values in the top 10% of the Red Angus breed and HB EPD value in the top 20% of the breed. Lot 36 is an 87.5% Red Angus bull. **GGP**

Red Angus Bulls

Lot 37 - WILSON WIDELOAD 502

Consigned by Wilson Farms - Bryan Wilson.

Lot 37 is another Pelton Wideload son out of one of the foundation dams at Wilson Farms. Boy does he exhibit volume and body mass! Lot 37 is in the top 15% for GM and top 25% for stayability EPDs in the Red Angus breed. This goes back to the things Wideload is known for: body mass and functional females. Lot 37 is 94% Red Angus bull. GGP

Lot 38 - FLRA 9095 LONATO RL19

Consigned by Finger Lakes Cattle Co..

30 years ago, we started collecting ultrasound data on all of our seedstock. At that time, we would be thrilled if an animal measured 1.0 square inches of rib eye per 100 lbs. of live scan weight. This flat-backed SENECA son is where we have moved the benchmark. Note Lot 38's 15.79 square inch rib eye, with a scan weight of only 1095 lbs! Let's do the math...that's 1.5 square inches of Rib per 100 lbs of body weight! These numbers don't lie, folks...and they are backed by multiple generations of both genotype and phenotypic measurements. Our SENECA daughters are turning into our favorite cows due to their ease at calving, their fault-free phenotypes, and the apparent ease at which they breed back. This bull has all the merits to do many things well. GGP

Lot 39 - FLRA 9095 LORADO RL22

Consigned by Finger Lakes Cattle Co..

This guy arrived unassisted at 76 lbs, and his 2 year-old mother performed like a veteran power-cow all summer long! She hauled him across the scales with a 771 adj. weaning weight ratio, and Lot 39 hasn't stop performing yet! His adjusted yearling weight was close to 1200 lbs., which merely reinforces and validates his breed-leading growth and performance genetic profile. At Finger Lakes Cattle Company, we continually strive to keep our ribeye measurements where the industry wants them...somewhere around 14 square inches. We feel that Lot 39 represents our breeding program, which focuses on fault-free bulls backed by generations of selection based on economically-relevant traits. GGP

Red Angus Bulls

Lot 40 - ERWINDALE BOBBI LANCE 2350

Consigned by Erwindale Farms LLC.

Lot 40 is a composite bull - 50% Red Angus and essentially 25% Simmental and 25% Hereford. He is definitely a sire that will cut input cost in your herd. His dry matter intake EPD is a 1.08, which puts him in the top 20% of bulls evaluated in the Red Angus breed. Just look at the mass and muscle this bull brings to the table, which is validated by a top 7% YG EPD value and top 15% REA EPD value. What an asset to any commercial herd! **GGP**

Lot 41 - ERWINDALE FIRE SHOWDOWN 2343

Consigned by Erwindale Farms LLC.

Lot 41 is a stylish, maternal gem with that desired deep red color! He is in the top 23% of the Red Angus breed for ProS, HB and Stayability EPDs. His own individual performance speaks for itself: an adjusted weaning weight of 721 lbs., 4.03% intramuscular fat and 14.67 sq. in. of ribeye area on an 1152 lbs. frame. Lot 41 checks all the boxes for a complete herd bull for mature cows. **GGP**

Hereford Bulls

Consigned by **Carousel Farms**.

Lot 43 is a Churchill Red Thunder son out of our herd matriarch, F 215Z Dominette 713. All of her calves stand out in the pasture from the day they are born. He continues to have that smooth overall look that just screams his females will be outstanding and his steers will excel in carcass quality. He is in the top 5% of the Hereford breed for baldy maternal index and \$CHB index. Really study Lot 43's genetic profile and realize what he is bringing to the table!

In our opinion, Lot 44 is one of the most complete HOUSTON sons which you will find anywhere in the United States. For us, Sustained Cow Fertility is one of the most important traits we use when breeding females for the future. Lot 44's SCF is in the top 5% of the breed, partly because his dam has maintained a 365 day calving interval on 6 calves, and has also earned the coveted Dam of Distinction designation in the Hereford breed. This young herd prospect is reinforcing all the rules of economically relevant trait composition. You be the judge: CE: top 7%, BW: top 5%, MM: Top 8%, Udder: Top 7%, Teat: Top 3%, Marbling: Top 23%, and REA: Top 17%. Lot 44 is halter and show-broke, and was exhibited at the 2023 NY State Fair. Homozygous Polled.

It's starting to get late, and its time for LAST CALL! We used PERFECTO 84F exclusively on our heifers for calving ease, but we got so much more than we expected once we combined him with our genetic resources. If you're looking for a carcass bull, Lot 45 is a young stud who posted a 15 sq. inch ribeye with a 1,000 lb. scan weight! That puts him in the top 7% of the entire breed all while posting a top 18% index for marbling. But wait...if you're looking for a maternal, herdbuilding bull, he's top 1% for MM. and top 1% for M&G. Lot 45 was born unassisted at 78 actual lbs, and his 2-year old Guaranteed 11G daughter nursed him all the way to a 644 lb. weaning weight. Here's a bull you really cannot miss with! Homozygous Polled.

Red Angus Yearling Heifers

Lot 46 - RED LEPAGE SYRINGA L3

Consigned by LePage Cattle Ltd..

Power Eye stamps his females and Lot 46 is no exception. You have to appreciate her length of body and how smoothly her shoulders tie into the top of her shoulder. Power Eye is known for being a calving ease sire, which he passed onto his daughter. She is also structurally correct with good feet and leg structure, as we expect from our favorite Candian genetics. Lot 46's twin sister recently sold at the Ohio Beef Expo and they really are peas in a pod. Note she scanned 5.09% for intramuscular fat in February, with very little backfat. Sells open. **GGP**

Lot 47 - RED LEPAGE LK ROYEE 68 L6

Consigned by LePage Cattle Ltd..

Lot 47 is a sound, functional female that also scanned over 5% in intramuscular fat in February with very little backfat. Look at that long, feminine neck that blends right into her shoulders. Her 11 year old dam has a MPPA of 102. Sells open. **GGP**

Lot 48 - WESSNER ROSE 2304

Consigned by B. Wessner Farms.

Boy is Lot 48 easy to pick out of the pen! She is a stout made female with some serious length of spine and a great feminine look. Her dam produced one of our top selling bulls last year at the Right on Red Sale that went to the Hess's at Bow Creek Farms in Pennsylvania. Coming from another long-time great cow line at B. Wessner Farms, Lot 48 will make quite a cow. Sells open. **GGP**

Red Angus Yearling Heifers

Lot 49 - FLRA 9352 LILLY RL02

Consigned by **Finger Lakes Cattle Co.**

My wife Anita called me "foolish" when she found out that this beautiful TREADSTONE female was in the sale offering. In case you are wondering...TREADSTONE is not one of those highly publicized bulls you'll find in the most current magazine. He's a bull that we found a few years back, and we bought some semen and started using him. This fancy female is quite a carcass queen, as she's our #1 ribeye (113 ratio) and #6 IMF (106 Ratio) heifers, and rolls out in the top 5% position for weaning weight, and top 5% for yearling weight. Lot 51 has a full sister at home, and I've assured Anita that she's here to stay! **SeXGGP.**

Lot 51 - FLRA E616 LUCY RL06

Consigned by **Finger Lakes Cattle Co.**

Since the early 1990's, Finger Lakes Cattle Co. has been building a herd by breeding cattle which are multi-dimensional and down-right useful. We have been driven to produce females which are noted for stayability, longevity, and fertility and who also possess breed-leading growth and carcass qualities. Profitability in the cow/calf sector will forever hinge upon the cows who stay in the herd the longest...and we truly believe that Lot 51 will become a matron for the long haul, and she'll leave behind a legacy of both high-growth bulls and fertile females. Sells open. **SeXGGP**

Red Angus Yearling Heifers

Lot 52 - FLRA H6629 LYDIA RL14

Consigned by **Finger Lakes Cattle Co.**

Finger Lakes Cattle Company used END ZONE on many of our 1st-calf heifers not only for calving ease, but also the fact that he is a high accuracy sire with fantastic genomic merits. We believe that Lot 52 possesses the same characteristics...her birth weight was only 61 lbs. which has resulted in her being a very moderate-sized female with the belief that efficiency is written all over her! She is a very low BW (top 1%) heifer, posting an across-the-board useful and practical EPD profile. Not only did she ratio 111% for marbling (5.84%), she was also the leanest heifer in her class with only 0.14" back fat. At 692 lbs, she scanned a rib eye of 9.08 sq inches, which computes to an REA/CWT of 1.31. Lot 52 is absolute proof that good things do come in small packages! Sells open. **GGP**

Lot 53 - MHF TILLIE 269

Consigned by **Mariposa Farm.**

Lot 53 is a Domain daughter that ties into the Mulberry line on the maternal side. You have to appreciate her body volume and easy fleshing ability. She had the highest percentage intramuscular fat percentage measured among heifers scanned in February at 6.15%. She is packed with maternal excellence. She is in the top 20% of the Red Angus breed for ProS, HB, calving ease and heifer pregnancy EPDs. She is in the top 2% for stayability EPD in the Red Angus breed. Sells open. **GGP**

Lot 56 - BW BLOCKANNA 2319

Consigned by B. Wessner Farms.

We bought Lot 56's dam from the Feddes camp last year. We fully intended to keep this heifer until she was born later than advertised, which put her out of our keepin' window. Lot 56 is out of the C-T Remarkable bull and the very popular Feddes Blockana cow line. Her dam was one of Chuck Feddes' pick of the sale and by far my favorite of the offering. Save the shipping and put some of Feddes' top pedigree and genetics into your herd. Sells open. GGP

Lot 57 - FLRA 9095 LOLITA RL24

Consigned by Finger Lakes Cattle Co.

This Seneca Daughter was bred to perform, and is pushing down the scales with a 943 lb. adjusted yearling weigh and a ratio of 110. Lot 57 comes from one of our strongest cow families which we identify as "convenience" cattle, meaning that they are always there when you need them, and seldom ask for anything in return. In addition, her maternal bloodlines have produced several bulls which have topped the performance indicators at the PA Bull Evaluation and Testing Program. Lot 57 is flat-backed, carrying almost 11 square inches of ribeye, and marbling scores which match her genomic profile. Sells open. GGP

Red Angus Yearling Heifers

Lot 58 - FLRA 9095 LAUREN RL26

Consigned by **Finger Lakes Cattle Co.**

Another high-performing Seneca daughter, Lot 58 combines strong carcass qualities with femininity, fertility, and above-breed average for stayability. All of the females on her maternal side originated from the original breeding stock which we started with when Finger Lakes Cattle Company was formed. This powerful and deep-bodied heifer posted nearly 11 square inches of ribeye and a forage-based yearling weight of nearly 850 lbs. Meanwhile, her herdbuilder index puts her in the top 1/3 of the entire breed, which helps us to make the speculation that she should stay in your herd for many productive years. Sells open. **GGP**

Lot 60 - WESSNER LILLY 2320

Consigned by **B. Wessner Farms.**

Letting Lot 60 go was a very difficult decision. Lilly is a later born calf that typically would never leave our herd, but with trying to maintain a tighter calving interval, someone will land some truly great genetics. Lot 60 comes from excellent growth and carcass cows and is stacked with Red Angus AI bulls back three generations! Look at her ultrasound intramuscular fat percentage—a testament to those great carcass genetics. I expect some pretty impressive progeny out of this gal. Sells open. **GGP**

Red Angus Yearling Heifers

Lot 61 - MHF CHARM 271

Consigned by **Mariposa Farm.**

Lot 61 is a Profitbuilder daughter out of a Gladiator daughter that exhibits length of body and an extremely feminine front end. This female is in the top 1% of the Red Angus breed for both weaning weight and yearling weight EPD values. However, she is also in the top 15% for both heifer pregnancy and marbling. All this combines to put Lot 61 near the top for both ProS and GM indexes. Note her very strong percent intramuscular fat when scanned for carcass traits in February. Sells open. **GGP**

Lot 62 - MHF RAPUNZEL 273

Consigned by **Mariposa Farm.**

Lot 62 is another Profitbuilder daughter whose dam was 10 years old when she was born. This stout heifers in the top 25% of the Red Angus breed for ProS and Gridmaster indexes. She is another feminine fronted female with excellent length of body. She is very similar in her EPD profile to paternal half sister Lot 61. She possesses very strong genetics for weaning and yearling weight, heifer pregnancy and marbling EPDs. Lot 62 has brood cow in her blood and her dam is once again pregnant at 11 years old! She, like her sister, scanned over 5% intramuscular fat. Sells open. **GGP**

Lot 74 - SPF 09J LIBBY 18L

Consigned by **Spring Pond Farm**.

The sire of Lot 74, SPF 15E JETER 09J, is a bull that we developed, and has been used in both the Spring Pond herd, as well as Gold Nugget Herefords. His genetic profile is strengthened by our Dam of Distinction SPF 028X Dianne 02D cow, and our satisfaction with his calves is very high. Whoever says that Herefords can't marble needs to take a look at the fact that Lot 74 scanned at 4.9% IMF! Coincidentally, her dam had a 145% ratio for IMF, and 118% for REA. Both the udder and teat scores for Lot 74 are ranked in the top 7% of the entire breed, and her Sustained Cow Fertility is in the top 35%. This one is a special heifer, and are honored to let her become part of your breeding program. Sells open.

Lot 75 - SPF 84F LOIS 22L

Consigned by **Spring Pond Farm**.

Lot 75 is a fancy PERFECTO 84F heifer who scanned over 10 square inches of ribeye while weighing only 711 lbs at her scan session! Simplified, that is 1.4 square inches of ribeye per 100 lbs...and we're excited that our genomics consistently breed big-ribbed and high marbling cattle without sacrificing fertility traits. The REA EPD for Lot 75 is in the top 10% of the Hereford breed...and what's really exciting is that her teat and udder EPD values are in the top 3% of the Hereford breed. This gives you an excellent udder in Lot 75 allowing her to add additional pounds of weaning weight to her calves due to her top 25% maternal milk without worry. Sells open.

Red Angus Bred Females

Lot 76 - 4Y LAURA K33

Consigned by 4Y Farms.

Lot 76 was bred AI on 10/1/23 to Bieber Atomic G297 and then pasture exposed to 4Y Stockman E116 from 10/1 to 12/1/23. This gives a projected calving date of 7/10 to 9/9/24 for an early Fall calf. Complete breeding details will be available on sale day. This moderate framed first calf heifer is top 1% of the Red Angus breed for ProS. Her Brunswick dam is well put together with a 105 MPPA. Lot 77 is also easy to work with. It was a difficult decision to let her go! **GGP**

Lot 77 - 4Y FRAN K64

Consigned by 4Y Farms.

Lot 77 was bred AI on 10/1/23 to Bieber Atomic G297 and then pasture exposed to 4Y Stockman E116 from 10/1 to 12/1/23. This gives a projected calving date of 7/10 to 9/9/24 for an early Fall calf. Complete breeding details will be available on sale day. Lot 77 has great length of body like her donor dam F08. She has a unique top tier EPD profile which combines elite growth, maternal and carcass traits. What a way to add genetics to your herd with this first calf heifer. **GGP**

Consigned by **Cayuga View Farm**.

The pedigree on this young cow is impeccable. She calved in late January 2024 and sells with her bull calf, 79A, at side. Lot 79 is in the top 5% of the Red Angus breed for both weaning and yearling weight EPD. She also possesses excellent carcass EPDs as well as heifer pregnancy. She will be ready to rebreed once you take her home.

Consigned by **Carousel Farms**.

Lot 80 is a balanced 3 year old female from the Pepin Program in Connecticut. Her first calf is now serving as a herd bull for Al Janke in Waterloo. She is bred to our herd sire F Masterplan 287, who is a trait leader in calving ease, weaning and yearling weight, udder characteristics and marbling. Lot 80 is confirmed pregnant for an end of May calf. She has a productive life in front of her with the added bonus of that desired dark cherry color and goggle eyes.

What a gorgeous commercial heifer! She is a ¼ Hereford ¼ Red Angus heifer sired by a Cuda son. Lot 81's sire is in the top 8% of the Hereford breed for \$CHB as well as the top 25% of the Hereford breed for calving ease, weaning weight, yearling weight, maternal milk, carcass weight, ribeye area and marbling EPDs. This mottled face beauty is feminine fronted with volume for days. She is square hiped with plenty of muscle definition. Sells open.

Red Angus Semen Packages

Consigned by : Swank Farm/C. Davis Farms

This semen package consists of 10 straws of the bull known as Stevie, owned by Swank Farm and C. Davis Farms. The cane of semen will be available on sale day or shipped directly from Zimmerman's in PA. Take a look at the amazing EPD profile of this bull! He's just a 2-year old and it looks like he has a bright future in front of him. Buy semen before everyone knows about Stevie!

Pleasant View Farms

RED ANGUS

Pleasant View Farms Red Angus is a registered herd that despite being relatively young, has big intentions. Our mission is producing **top quality Red Angus** cattle. Our goal is to raise and breed our animals to benefit any operation. Whether you are a commercial cattleman or someone looking for a competitive show heifer, we can help. We strive for animals that are balanced well by breeding for performance, disposition, and phenotype. Through purchasing excellent females and utilizing resources such as artificial insemination and embryo transfer we are aiming to produce **nothing but the best**. We also raise and sell premium quality beef available for retail purchase on our farm or in bulk by 1/4 and 1/2 share.

Producing animals that are balanced by combining the best of performance, maternal, and phenotype.

4Y Red Angus

Steven & Rosemarie Yousey

1642 County Line Rd

Lyndonville, NY 14098

716-765-2658

Our herd began with six crossbred cows in 1995. In 1996, we purchased our first registered Red Angus sire, producing excellent offspring for many years. In 2004, our herd sire came from Bieber Red Angus as the first of many females and sires over the years. We have added very selected sires from top Red Angus herds to produce the quality targeted. Our herd is now all registered and genomically tested. We added IVF embryo transfer to increase the females available, some of which are in the offering.

Coming from a commercial background, we strive to have cattle with genetics of superior quality for premium marketing channels like Top Dollar Angus and Red Angus tag programs. Cattle bred right can offer great options in marketing from freezer trade to finished cattle sold on grid basis.

Sales · Service · Parts · Rentals
of Agricultural, Landscape, & Construction Products

MASSEY FERGUSON

Premier feeds for the livestock industry.

Our signature Super Flakes are a steam-flaked corn product that offer unrivaled digestibility and starch availability and have been a staple in high-productivity herds across the Northeast for two decades.

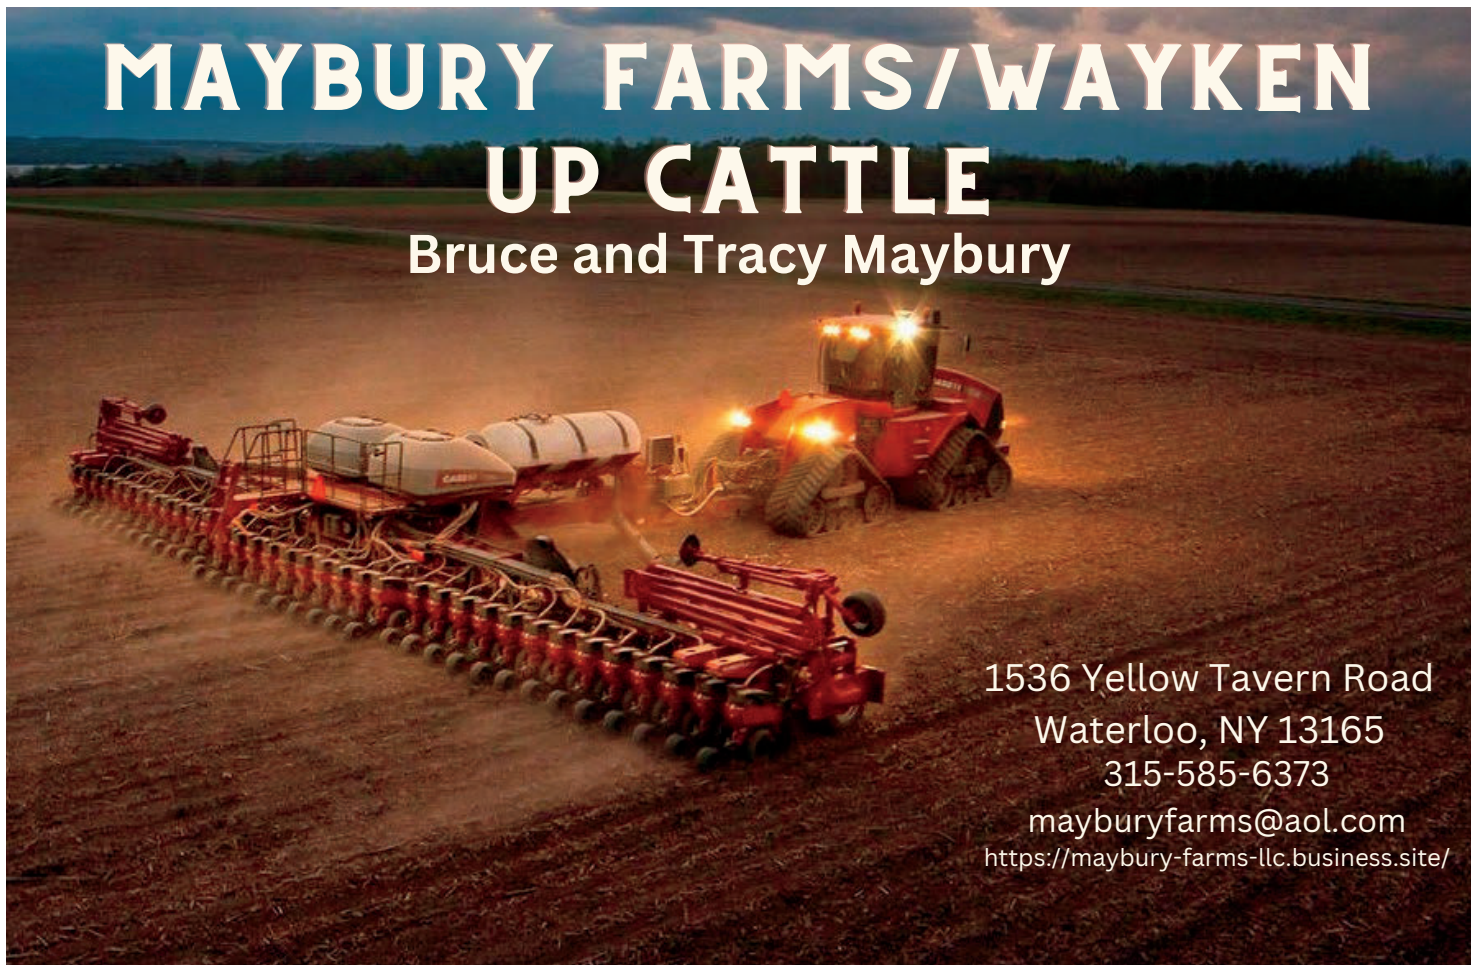

We also deliver straight commodities and blend a variety of ingredients including chocolate, cottonseed, molasses, soymeal, cornmeal, and canola meal to make high quality feed for a range of applications.

Call or text us anytime at (585) 734-1920

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
